

September 04, 2009

Dear valued customers, business partners and friends,

I hope you enjoyed your vacation with your family and friends and you are back at work with lots of fresh energy.

As we are in the second half of this difficult year 2009 we are finally seeing some relief. Business is picking up in several industries and the capacity utilization is increasing. This definitely is a good sign and we can assure you that Dürkopp Adler America will be right at your side to support you with anything you might need.

No matter if you need machinery or if you want to touch up your existing equipment. We have the right offer to keep your investment reasonable and your production reliable.

Our service manager Alan McGonigle will be glad to provide you with additional information on our service capabilities. You can reach him at +1 770 446 8162, ext. 1130.

For any question on our products, just give us a call at 770 446 8162, ext. 1145 or 1160. Also if you have any proposal for a future issue of our newsletter, feel free to contact us. We are always looking for new ideas and stories.

Kindest regards

Patrick Weissgerber

President
Dürkopp Adler America, Inc

Machine in Focus:

868-490322

New M-Type Split Needle Bar System

Following the demand of the market, the new Dürkopp Adler Class **868-490322**, **introduces a versatile and reliable split needle bar system** for all sewing operations that require perfect angles.

First presented during this year's IMB show in April, the split needle bar systems turns out to be a great success.

The main reason for this success is that the addition of **the split needle bar system does not reduce the potential and performance parameters of the original Dürkopp Adler 868 post-bed machine.**

The 868-490322 features the well known characteristics of all M-Type post-bed machines.

Moreover this new machine is **extremely easy to use.** The **needle bars can be engaged and disengaged by push buttons.** The **"Single Stitch" function ensures neat corners and angles.**

Finally the M-Type split needle bar system is an **integrated solution that can be used in any M-Type sewing machine**, no matter if it is a flatbed, post-bed or cylinder-bed machine.

Due to its versatility the split needle bar can add enormous value to your production.

Call our Division Manager, Mr. Don Ullrich, at +1 770 446 8162, ext 1145 for more information.

Technical Service :

Quality matters:

Buying used machines is a matter of trust

Unlike buying new equipment, the purchase of pre-owned machines always is a difficult decision to make. Not only that you do not know what you get, it is also unpredictable what additional cost will arise after the purchase.

At the end it is a matter of trust.

We take pride in saying that ***Dürkopp Adler America*** served the sewing industry with new sewing equipment throughout the last years and ***earned a reputation as a reliable and honest partner for our customers.***

One important point in gaining customer confidence is offering trial machines to allow our customers to actually sew their material and thread and get convinced by results.

Over the years we used several different machines for trials and we are now replacing those machines. Therefore ***we can offer our former trial machines for sale at exceptional prices.***

Most of them are in excellent condition and look just like new.

Take benefit of that offer and ***save up to 70%*** compared to the price of a new machine.

As for our new equipment ***we certify the proper function of those machines.*** We can even sew them off on customer material.

Visit us today at

<http://www.durkoppadler.com/en/main/salesservice/usedmachines.html> to have a look at our used machine promotions or call our internal sales manager Mr. Ed Atkinson at +1 770 446 8162, ext. 1191. We are glad to provide you with any additional information you need.

Choose the reliable source for your purchase. Choose Dürkopp Adler America!

Behind the Scenes :

Beisler - A Dürkopp Adler brand

Since several years, Beisler GmbH in Hösbach, Germany, is well known as ***the leading manufacturer for sewing automation, specialized in machinery for the pants production.***

It is not so commonly known that ***Beisler is a member of the Dürkopp Adler Group.***

In order to benefit from the resources of Dürkopp Adler and to facilitate logistics and processes, the decision was made to relocate the production facilities of Beisler GmbH from Hösbach to our global headquarters in Bielefeld.

This transition will take place in different, subsequent steps until the end of this year 2009.

By January 01, 2010, the production facilities of Dürkopp Adler in Germany will be consolidated in Bielefeld. But more important, besides the production itself, also the sales, service and marketing capacities will be unified and more efficient.

This will allow us and you to benefit from much broader production environment and service resources.

Independently from the changes in Germany, ***Dürkopp Adler America*** will remain your reliable source for all sewing automation needs and of course we ***will continue to offer the full line of Beisler machines, such as:***

- ***Pocket Welting Machines***
- ***Automatic Serging Units***
- ***Automatic and Semi-Automatic Side Seamers***
- ***Automatic J-Stitchers***
- ***Automatic Pocket Facing Units***

Just call us for any further information and for any consultation to define potential for sewing automation in your sewing facility. ***Call our Division Manager, Mr. Wolfgang Wendt, at +1 770 446 8162, extension 1119 or send an email at wwendt@durkoppadler.com.***

Choose the reliable source for your purchase. Choose Dürkopp Adler America!
